

Dear Parents,

Throughout the school year your child will be participating in STEAM focused, project based learning activities, STEAM stands for Science, Technology, Engineering, Arts, and Mathematics. The goal of STEAM is to provide students with real-world problem solving opportunities. STEAM allows students to think outside the box with project-based learning. Your child will be working on many exciting STEAM projects this year!

Below is a list of household materials that we will be using to create our STEAM projects. If you are willing to recycle/purchase/donate any of the items below, please send them to the classroom with your child whenever you have them, throughout the year.

Thank you in advance for helping our school collect these items for STEAM projects! Please let me know if you have any questions. I can be reached at (706) 468-6284 or via email at mmbrown@jasper.k12.ga.us.
